

# GREEN-DRI SIZE LIMITATIONS

Green-Dri has no real size limitation. We have built very small 100 board feet lab-test units like you see on your left to larger ones over 200,000 board feet capacity (Largest to date: 72ft W x 23ft D x 18ft H), larger than the ones you see below. Also, various door systems can be used such as swing-doors, sliding doors, or accordion type doors.

Green-Dri is a very flexible product which can be tailor-made to user's specific requirements
